**Box No. V** Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

## 1. Statement

Novelty (N)	Claims 1-13	YES
	Claims	NO
Inventive step (IS)	Claims 1-13	YES
	Claims	NO
Industrial applicability (IA)	Claims 1-13	YES
	Claims	NO

## 2. Citations and explanations (Rule 70.7)

**Novelty and Inventive Step (claims 1-13)**

The present invention is directed to a method of forming a metal coated steel strip having a brushed finish comprising the steps of (a) passing the steel strip through a molten bath of metal, (b) skin pass rolling the metal coated strip, followed by (c) brushing the rolled and coated steel strip.

The closest prior art document is EP 483810 A (KAWATETSU GALVANIZING CO LTD) 6 May 1992.

This document discloses the features of (i) galvanising the steel sheet with a zinc or zinc-aluminium alloy, (ii) rolling the coated steel to minimize the spangles, followed by (iii) brushing the coated steel with a rotary brush. However, the steps are not in the same order as that in the present invention. Therefore despite the scope of this citation being broad enough to encompass the features of the present invention, it teaches away from the present invention by stating that the brushing step is between the cooling device and the skin pass rolling mill, unlike in the present invention where the brushing occurs after the skin pass rolling.

Therefore the present invention is novel and inventive.
